How to use this log

Keep it next to your keyboard. One page per fishing session, then fill in the trackers at the back.

Session pages

Write down where you fished, your skill at the start and end, your pole and lure, and everything that came up. After a few sessions you'll know which spots are worth your time.

Trackers

Color in your skill as you level, tick off Nat Pagle's fish, log your Sunday contests, keep a gold ledger and build a list of every fish you've caught.
